TREDnet

RESIDENT ENGINEERING PLATFORM

TRIGO Global Quality Solutions

WHAT IS TREDNET?

TREDnet is an added benefit to working with TRIGO's Resident Engineering Services. Currently working with 350+ Resident Engineers, totaling 800+ projects in 29 countries, across 4 continents, it is a dedicated space that merges all project related information into one smart system. TREDnet provides our clients the ability to make calculated decisions, based on what is happening throughout their project. This complimentary platform increases transparency and information sharing between TRIGO Resident Engineers and Clients. View the TREDnet video HERE.

TREDNET CUSTOMER BENEFITS

- Real-Time notification and data management on all projects

- Reporting available with instant exporting/download options

- Transparency on project details (representative workload/efficiency, service plants, activity reports and all related analytics and data)

- Ability to customize dashboards to the need of our customers

- Helicopter view on all metrics, giving customers full control on next steps and decision making throughout the project

- Two-way communication with TRIGO Resident Engineers and customers

TREDnet is the future. It ensures that our Resident Engineering services stay at the forefront of providing quality, with a technology enabled, data driven service. To date, training and an internal kick-off has been successfully launched with select key users throughout Europe, America, and Asia.

LET'S CONNECT!

To set up a one-on-one meeting to further discuss TREDnet and receive a live demo of the platform, CLICK HERE! We look forward to speaking with you soon!
